

BULLET-PROOF YOUR DATA

Unlike enterprises, many smaller companies cannot afford optimal in-house strategies to protect their wealth of data. Consequently, they are at an elevated risk of being put out of business when data is corrupted or lost. Vital to a business' survival are its correspondence, e-mails, accounts/records, patient/client files, legal transactions, and service or purchase requests.

Evaluate your company's data protection issues:

- Do you have a back-up plan, off-site storage?
- Can data be quickly retrieved in the event of an emergency?
- Is every data entry immediately saved, backed up and secured?
- Is your data management plan cost-effective?
- Does your system have a limited data capacity or flexibility for growth?

About the Speaker:

TOM REED, *Vice President of Voyage Technologies*, 30-year industry veteran. Experienced in leadership positions with Unimax Systems Corporation, World Data Products, Epicor Software, and IBM Corporation.

With extensive experience at leading hardware, software, and services companies, Reed is often sought after for his extensive knowledge of business strategy and current technology.
